

Streaking and Clutching in Round-Based First Person Shooter (FPS) Esports

Tony ElHabr

Game types

- Search and Destroy (SnD) in Call of Duty (COD)
 - 2020-2022 Call of Duty League (CDL) matches (qualifiers and majors)
 - 4v4.
 - First to 6 round wins
 - Teams swap sides (offense and defense) after every round
- Plant/Defuse in Valorant
 - Data from Valorant professional league, updated through January 1, 2022
 - 5v5
 - First to 13 round wins
 - One team plays offense in 12 consecutive rounds before swapping sides
 - Must win by 2 rounds

How does a team win a round of COD SnD / Valorant plant/defuse?

1. One team eliminates all members of the other team prior to a bomb plant.
2. The offensive team eliminates all members of the defensive team after a bomb plant.
3. The defensive team defuses the bomb after a bomb plant.

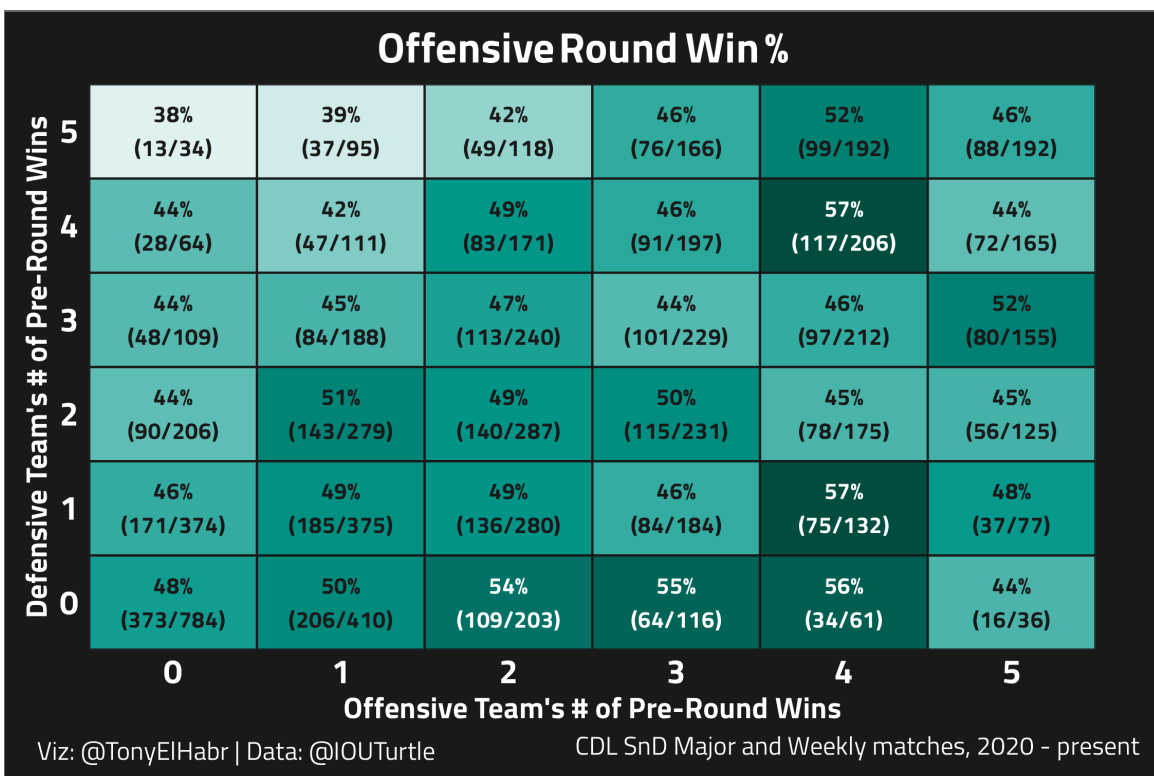

Often the defensive team will try to eliminate all o team members prior to making the defuse, but in some cases, they may try to "ninja" defuse.

4. The offensive team does not make a plant by the time the round timer ends.

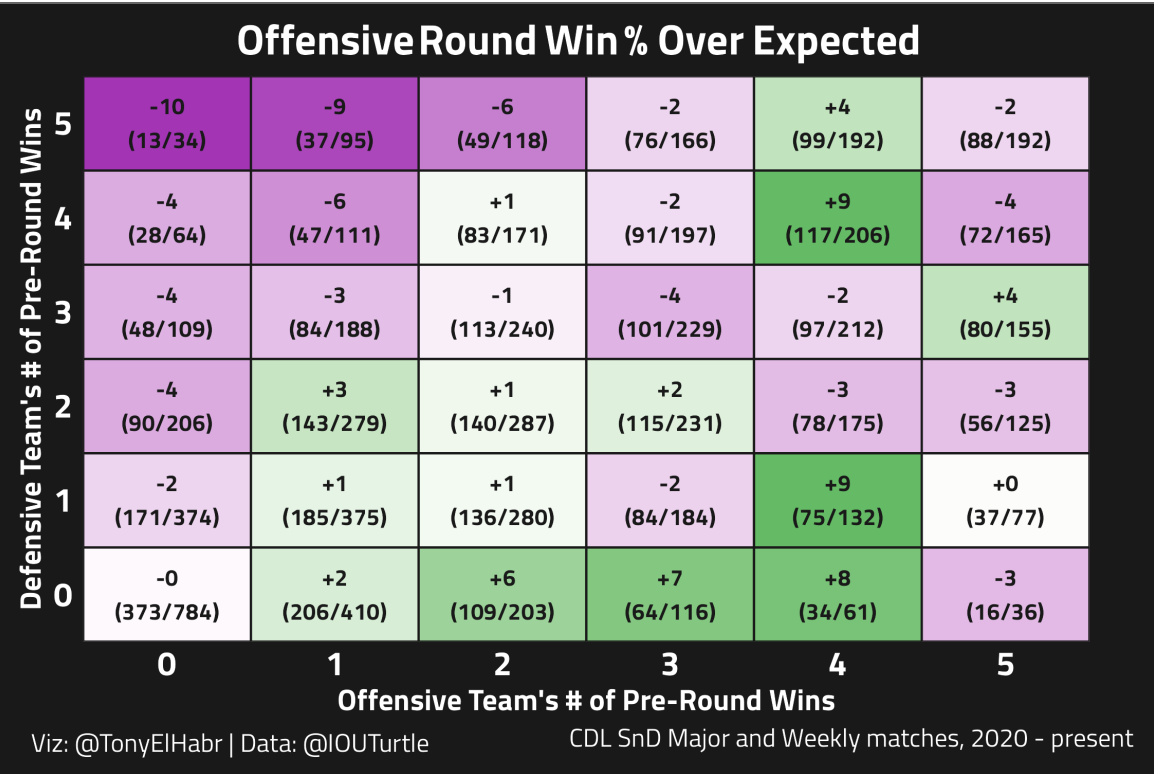

COD SnD data overview

- Total series: **784**
- Total rounds: **7,179**
- Offensive plant %: **52%**
- Offensive win %: **48%**
- Win % when planting: **66%**
- Win % when earning first blood: **73%**

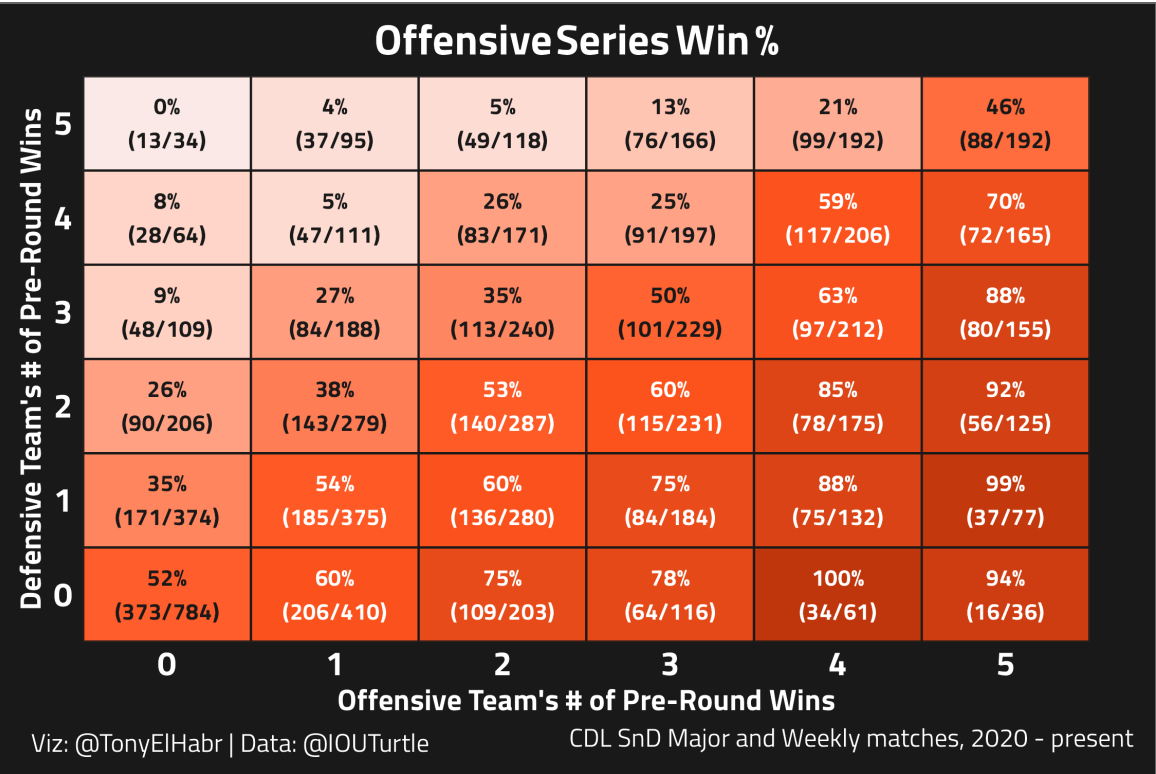

What are your chances of winning a round, given the series state?

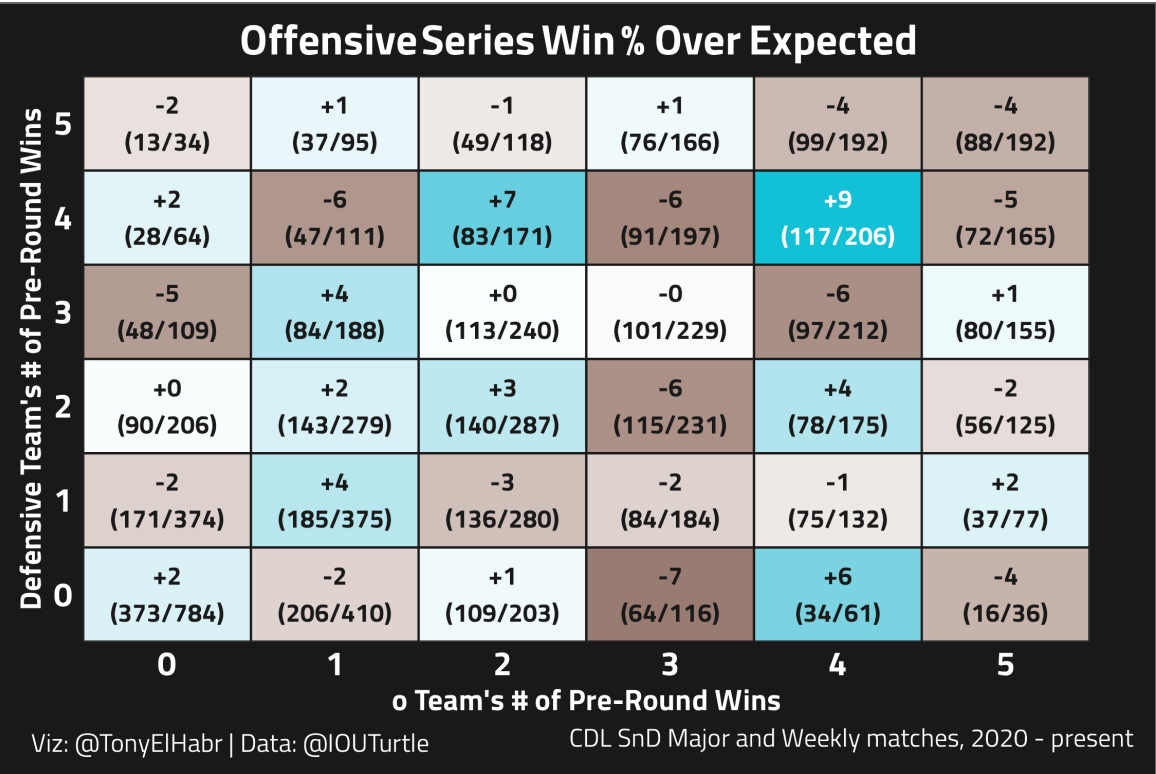

How do the empirical round results compare to expectation?

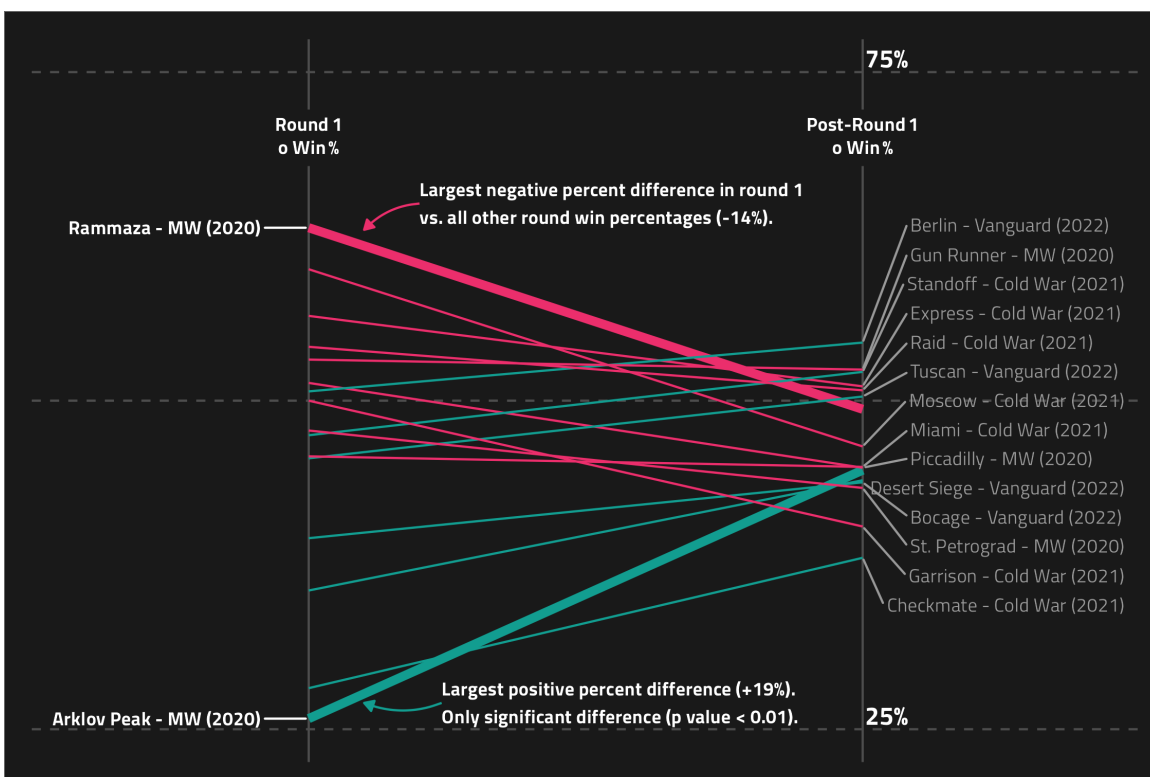

What are your chances of winning the series, given the series state?

How do the empirical series results compare to expectation?

Are offensive win %'s different in round 1?

Are offensive win %'s different in round 2?

What are the most common series winning states?

How do end states compare to expectation?

When do back-to-back round wins occur?

Is there evidence for the “hot hand”?

- Round win % after a streak of 3 round wins:
- Expected: **38.4%**
- Actual: **55.7%** (352 / 632)

What is the optimal strategy?
